

NUTRILEADS CLOSES SERIES A ROUND TO ADVANCE THE DEVELOPMENT OF ITS LEAD NUTRITIONAL INGREDIENT SUPPORTING IMMUNE FUNCTION

March 29th 2017, Wageningen, The Netherlands, Dutch nutritional health ingredients startup NUTRILEADS B.V. today announces the successful closing of a Series A financing round with existing shareholders DSM VENTURING, PPM OOST, SHIFT INVEST and THUJA CAPITAL.

NutriLeads develops supportive nutritional ingredients for application in dietary supplements, medical food and functional food products intended for specific target populations seeking to support their immune function. Its lead ingredient aims to support immune function and increase resistance to common infectious diseases such as colds and flu.

A proof of concept study in human volunteers showed an excellent tolerability and safety profile. More importantly, a dose dependent effect regarding the enhancement of immune function was demonstrated. In addition to these positive clinical results, a recent production pilot showed the feasibility of a cost-effective and sustainable production process for its lead ingredient.

The current Series A financing will be used to support the further development of NutriLead's lead ingredient, a novel Immune Modulating Plant Polysaccharide. During the next phase, production will be scaled up and two human clinical trials to substantiate the immune supportive effect in different target populations will be performed.

"The current investment supports the fast track development of our lead ingredient for application in dietary supplements, medical foods and functional foods. We are confident that this will help us realize our ambition to partner with ingredient suppliers and food companies to bring the benefits of our health ingredients to patients and consumers" indicates Ruud Albers, PhD, CEO of NutriLeads.

FINAL

NutriLeads

catalyzing nutrition & health innovations

NUTRILEADS is a startup that develops nutritional ingredients with demonstrated health effects. NutriLeads aims to catalyze nutritional health innovation in the food industry by partnering with relevant companies to identify promising lead ingredients, developing sustainable and commercially viable production processes, managing the regulatory challenges and initiating scientific & clinical programs to substantiate the health effects of these ingredients. Together we will bring the benefits of the proprietary ingredients to patients and consumers.
